

# Exporter Report

## Introduction

### 1.1 Purpose

The purpose of this report is to provide an overview of the [Program Name] program, which is designed to facilitate the viewing of CSV files in a table format and enable users to save the table content to MS Excel.

### 1.2 Program Features

Ability to load and import CSV files.

Displaying the CSV data in a table format.

Sorting and filtering the table data.

Saving the table content to MS Excel.

## Program Overview

### 2.1 Program Description

Exporter is a VB.NET program that provides a user-friendly interface for viewing CSV files. It allows users to browse and open CSV files, displaying the data in a tabular format for easy analysis and interpretation.

### 2.2 Program Interface

The program's interface consists of a main window with a upload button, print button, and a table display area.

## Loading and Viewing CSV Files

### 3.1 Locating and Selecting CSV Files

To load a CSV file, users can click on the "Open" button or select "File" > "Open" from the menu. A file dialog will appear, allowing users to navigate to the desired CSV file and select it.

### 3.2 Importing CSV Data

Once a CSV file is selected, the program will import the data and display it in a table format. Each column in the CSV file will be represented as a column in the table, making it easy to view and analyze the data.

### Saving Table Content to MS Excel

#### 5.1 Exporting to MS Excel

To save the table content to MS Excel, users can select "File" > "Export to Excel" or click on the "Save to Excel" button. This will generate an Excel file containing the table data.

#### 5.2 Selecting Destination Folder

A file dialog will appear, allowing users to choose the destination folder for saving the Excel file. Users can navigate to the desired folder and provide a name for the Excel file.

#### 5.3 Saving the Excel File

After selecting the destination folder and providing a file name, users can save the Excel file by clicking "Save" in the file dialog. The program will generate the Excel file with the table content.

### Conclusion

The Exporter program offers a convenient and efficient way to view CSV files in a table format. Users can explore and analyze the data using various features such as sorting, filtering, and exporting to MS Excel. This report has provided an overview of the program's features and functionality.
